Muhammad Noman Ashraf
Software Engineer

Nomi.devx@gmail.com 0331-9025470 github.com/NomiDevx

PROFESSIONAL SUMMARY

Results-driven Software Engineer specializing in scalable digital solutions. Proficient in cross-platform mobile development with Flutter expertise and Android development with java, integrated with intelligent backend automation (n8n). Experienced in agentic AI development leveraging CrewAI, LangGraph, and AutoGen frameworks, alongside AI automation and custom model training for product evaluation. Committed to delivering optimized performance, clean architecture, and seamless user experiences across the entire technology stack.

SKILLS

- ***Automation & AI Engineering**:* Agentic AI Development (CrewAI, LangGraph, AutoGen, LangSmith), AI Automation (n8n Workflow), Custom Model Training (NLP).
- ***Flutter Development:*** Flutter (iOS/Android), Dart, Android (Java), Responsive UI/UX (Figma), Clean Architecture, REST APIs, Provider, Google ML Kit, Firebase.
- ***Management & Tools:*** Agile/Scrum, Git/GitHub Workflows, Software Project Management (SPM), Software Re-Engineering (SRE) Principles
- ***Programming Languages:*** Python, Java, C++, HTML, CSS, JavaScript

PERSONAL PROJECTS

Flutter Development:

- ***Idea Presentation Plateform(Idea Press):*** Engineered an AI-powered platform for idea presentation and analysis using Flutter; integrated AI models for automated evaluation and implemented custom model training to assess feasibility and market potential.
- ***Image Detection System App(Scanova):*** Built a real-time object detection application leveraging Google ML Kit with Flutter; enabled camera and gallery-based image analysis with dynamic result visualization.
  GitHub: https://github.com/NomiDevx/Scanova-imageDetection
- ***Fit Body Fitness App:*** Developed a comprehensive fitness tracking application featuring workout plans, diet monitoring, and goal management; emphasized intuitive UI design and efficient local data persistence.
  GitHub: https://github.com/NomiDevx/Fit-Body-Fitness-App
- ***Café Shop App***: Designed a streamlined café ordering application with product catalog, cart management, and checkout functionality; implemented state management using Provider pattern.
  GitHub: https://github.com/NomiDevx/Coffee-Shop-Flutter-application
- Other Projects : github.com/NomiDevx

Automation & AI Development:

- ***Medical Research Intelligence System:*** Architected a multi-agent AI system using CrewAI and DeepSeek with six specialized agents to analyze medical literature and generate research reports with citations. Integrated PubMed/Semantic Scholar APIs, implemented PDF processing and statistical analysis to assist healthcare professionals and pharmaceutical researchers.
  GitHub: *https://github.com/NomiDevx/-Medical-Research-Intelligence-System*
- ***Financial Market Analysis System:*** Developed a multi-agent financial research platform using CrewAI with DeepSeek LLM for real-time market trend analysis and automated investment report generation. Engineered specialized agents for stock evaluation, market data processing, and structured reporting.

  GitHub: *https://github.com/NomiDevx/Financial-Researcher-Muilti-Agent-CrewAI-*

- ***Development Team Management System:*** Built an autonomous software development workflow leveraging CrewAI and DeepSeek for intelligent project planning, task delegation, and team coordination to streamline the development lifecycle.
  GitHub: *https://github.com/NomiDevx/CrewAI-Devlopment-Team-Management-Project*

- Designed and deployed agentic AI systems also using ***LangGraph***, and ***AutoGen*** frameworks for autonomous task execution and intelligent decision-making.
- Developed intelligent workflow automation solutions using n8n to streamline business processes and data pipelines.
- Implemented AI automation workflows integrating custom-trained NLP models for domain-specific applications.

EDUCATION

HITEC University Taxila — Taxila Cantt, Pk

Bachelor of Sciences in Software Engineering — Expected Graduation: July 2026

Cumulative GPA: 2.96/4.00

CERTIFICATIONS

AI Engineer for Data Scientists Associate — DataCamp

Credential ID: AEDS0015371531706 — From: Feb 2026 - March 2026

Prompt Engineering with the OpenAI API — DataCamp

From: Jan 2026 - Feb 2026

ADDITIONAL

- **Languages :** Urdu(native), English(fluent)
- **Interest:** Traveling, Cricket and Exploring Emerging Technologies
